

Draw 3
types
of wing

What shaped wings will
enable your bird to survive?

Create your own wetland bird

- 1 Observe the different beaks, wings and feet of the birds around you.
- 2 Draw 3 different beaks, wings and feet.
- 3 Think of a habitat where your bird will live. Which of the wings, beaks and feet would make your bird well adapted to survive in your habitat?
- 4 Choose a beak, pair of feet and wings to draw on the dotted outline to create your own imaginary bird.

Draw 3
types
of beak

What beak will your
bird need to feed?

Draw 3
types
of feet

What feet will your bird need
to move around its habitat?
